About Dinghy UK Ltd

Dinghy is a world first insurance provider of on-demand business insurance for self-employed professionals and freelancers. We believe in changing insurance for the better.

Why on-demand Professional Indemnity?

Most self-employed professionals cancel their insurance at the end of their contract. By allowing our insureds to tell us when they are not working and reduce their Professional Indemnity insurance when they finish a project, rather than cancel their policy, our customers can maintain their insurance without overbearing costs; and their clients can have extra comfort that should the worst happen, the Professional Indemnity insurance will still be there when needed.
